	<p>You may have already noticed: since the start of the new millennium a dynamic development process has been ongoing at AVB.</p> <p>The development of an organisation with more than 130 years of know how that is a market leader worldwide in the domains of certification and inspection.</p> <p>Step by step we continue to consolidate this reputation. With a rise by 25% of turnover in the past three years, a healthy investment policy in order to make better use of our Human Resources for your benefit, the development of our 12 subsidiaries abroad, and since the beginning of this year a new head office in the heart of the European Union.</p> <p>The move to our new office has brought us to the next phase in our development. In 1989 AIB and Vinçotte merged. Today we adopt a new brand name and visual style: brief and to the point 'Vinçotte'. A convincing identity that clearly shows who we are and what we represent: a worldwide total solutions provider, which assists its 40,000 clients in all domains of quality, safety and the environment. Our further growth through diversification – continue to provide even more specialised services – and internationalisation – following our clients and their expansion or delocalisation, as well as establishing ourselves in emerging markets – will undoubtedly gain momentum from our new identity. A very strong brand, in one word, generates a clearer image.</p> <p>We are convinced that working with Vinçotte is a pleasant and mutual development process: you provide us with the opportunities to develop; we provide you with the knowledge to grow. With mutual trust and respect and thanks to the commitment of our 1,734 enthusiastic employees.</p>

<input checked="" type="checkbox"/> <b>VGS</b> 2003-october	<b>Promotion of the VGS conformity mark</b> Vinçotte send a VGS promotion folder to the 6500 largest companies in Belgium.
<input checked="" type="checkbox"/> <b>OK compost HOME</b> 2003-september  	<b>Launch of OK compost HOME</b> Back in 1995, AVB announced a brand-new development in the form of the OK compost conformity mark. Certifying that the products in question are in keeping with the EN 13432 harmonised standard, the <b>OK compost</b> standard soon became recognised as the mark by which other ones are judged in this area.  Eight years later, AVB has decided to launch <b>OK compost HOME</b> .  In addition to <b>OK compost</b> , which covers products intended to be collected and taken to an <u>industrial composting centre</u> , products certified according to the <b>OK compost HOME</b> system may be composted in your <u>garden</u> .  The difference between tests resulting in product certification is reflected in the temperature required to achieve degradation (which is lower in the case of <b>OK compost HOME</b> ) so as to guarantee the degradation process is followed through to its conclusion in a composter operating normally.
<input checked="" type="checkbox"/> <b>OK biodegradable</b> 2003-july	<b>The first product OK compost &amp; OK biodegradable</b> - <b>GROEN CREATIE</b> (Belgium): Plant pots
<input checked="" type="checkbox"/> <b>OK compost</b> 2003-may	New Licensee: - <b>GROEN CREATIE</b> (Belgium): Plant pots

<input checked="" type="checkbox"/> <b>VGS</b> 2003-april  	<p><b>NEW LOGO FOR VGS</b></p> <p>The VGS mark of conformity was created in 1986. From the outset, its aim has been to promote the safety of workers and consumers and the quality of products. Based on high-level criteria, the VGS mark very quickly became established as a European leader in the field of lifting-device certification.</p> <p>Quickly known and recognised, today the VGS mark and its logo apply to a vast range of products. Geographically, the mark has also spread far beyond our borders, with French, Dutch, German, Norwegian and Austrian companies among the Licensees of the VGS mark.</p> <p>After 17 years of loyal service, the logo deserved a new lease of life. It is this new logo that we are previewing here.</p> <p>During the transition period (till 31/12/2004), the old one is still valid.</p>
<input checked="" type="checkbox"/> <b>OK compost &amp; VGS</b> 2003-march	<p><b>NEW &amp; EASIER: Automatic link to the Licensee's web site</b></p> <p>The new lists of certified products provide a link to the Holder's web site.
