OK biobased **Conformity Mark**

This document contains the list of the OK biobased certified products (Chapter B).

The products are sorted by the biobased carbon content, measured according to ASTM D6866, and assessed according to the Vinçotte OK biobased specification.

- * means a biobased carbon content between 20 and 40 %
- ** means a biobased carbon content between 40 and 60 %
- *** means a biobased carbon content between 60 and 80 %
- **** means a biobased carbon content of more than 80%

Download the last version of this list.

or scan the QR code

A finished product made of an OK biobased certified basic or raw material, does not automatically comply with the requirements of the OK biobased certification scheme. Because of the other unknown components that can be added to the finished product (ink, glue, ...), this finished product needs to be submitted to OK biobased certification in order to have the permission to put the OK biobased mark on this finished product.

The conformity of the products is guaranteed by the procedures for awarding and use of the 'OK biobased' conformity mark. This only applies to specimen bearing the 'OK biobased' mark.
